

The bolt cage is matched to fit various base-plates of our pole range. Our standard hole spacing for the base-plates is 250mm diagonal for 3m poles, 300mm diagonal for 6m poles and 400mm diagonal for 8m poles. We use a M14 for 3m poles, M16 for 6m poles and M20 for 8m poles. Each baseplate has a top and bottom galvanized holding plate to ensure correct spacing of threads the threaded bars.
