

MSP4.5M90127ST | 90MM 4.5m Stepped Pole

The stepped poles have a smaller top section and larger bottom section.

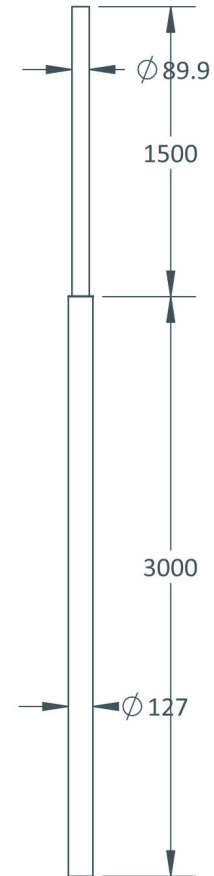

Outside Diameter: 90mm/127mm – Length 4.5m.

The stepped pole can be buried directly into the ground and concreted in place.

Please note a minimum of 1m should be in the ground and the ground should be highly compacted prior to installation of the top solar structure. All poles are hot-dipped galvanized.
