

MSP8M101139ST | 101MM 8m Stepped Pole

The stepped poles have a smaller top section and larger bottom section.

Outside Diameter: 101mm/139mm – Length 8m.

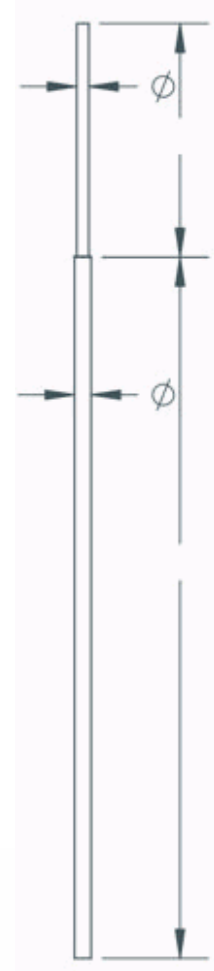

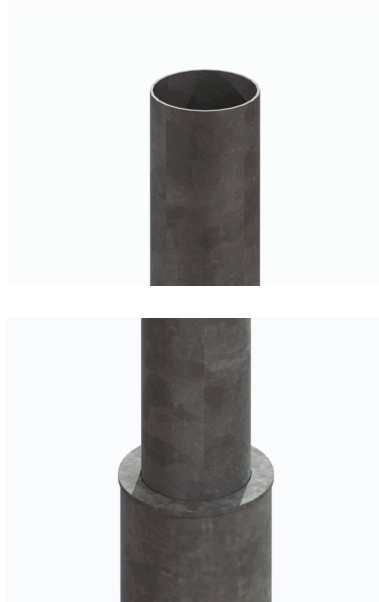

The stepped pole can be buried directly into the ground and concreted in place.

Please note a minimum of 1m should be in the ground and the ground should be highly compacted prior to installation of the top solar structure.

All poles are hot-dipped galvanized.
